

TEST POINTS for Temperature and Pressure

TEST POINT

FEATURES

- Brass body
- Neoprene sealing bushes
- Connection size 1/4"
- Facilitates measurement of temperature and pressure in water or non-corrosive fluids using portable thermometer/ pressure gauge
- Maximum operating pressure 16 Bar (25 Bar optional)
- Maximum working temperature 110°C

PRESSURE GAUGE

BENEFITS

- Facilitates temperature and pressure measurement during commissioning and operation of HVAC system at various locations using one/few pressure gauges/thermometers
- Reduced number of gauges/ thermometers required
- Averts variations in readings due to calibration difference of various pressure gauges/thermometers
- Reduced equipment failures
- Economical

DIGITAL TEMPERATURE INDICATOR

TECHNICAL DATA

Material

Body	:	Brass
Sealing bushes	:	Neoprene
Connection size	:	1/4" BSP (6 mm)
Max. operating pressure	:	16 Bar (25 Bar optional)
Max. working temperature	:	110°C
